INTRODUCTION

Beck Assets is a dynamically developing trading company whose business model is based on crowdfunding-based investments. Thanks to our expertise and experience, we operate extremely successfully in the cryptocurrency, NFT and stock markets.

In the past period, we worked exclusively with large investors through our offline platform, and these relationships were of fundamental importance to our company, as they allowed us to be outstandingly successful in the industry.

«BECKASSETS» HISTORY

However, in February 2024, we saw the time to move on and expand our investment opportunities in the online space as well. With this, we create an opportunity to reach interested parties and investors even more widely. The aim of our online expansion is to reach investors who previously could not participate in the opportunities offered by Beck Assets and to make our investment platform and services even easier and faster for them to access. At the same time, however, we continue to maintain the high-quality investment opportunities and services for which our clients have chosen us.
